

High-performance drill bit for the drilling of through holes or large-diameter blind slots. Especially for the shaping of woodworking parts Can be combined with a plug cutter.

- Especially for hard and soft woods
- Especially for woodworking
- Precise drilling
- Superior long life
- Anti-rotation attachment

- Carbon steel
- Tri-flat shank
- Special teeth
- Centring point

Machine

Application

Features

Properties and benefits

- + Carbon steel: body designed in a grade of steel designed for thermal processing, enabling excellent power and torque transmission. ➡ Enables the fast and precise cutting of the tools into soft and hard woods. Superior service life.
- + Tri-flat shank: cylindrical shank with 3x 120° flats, for 3-piece drill chucks. ➡ Enables maximum torque transmission Prevents the rotation of the bit in the chuck. Specially adapted for through-holes.
- + Special teeth: scalloped teeth designed for fast and precise cutting. ➡ For the fast and precise cutting of soft and hard woods.
- + Centring point: cut designed with a central centring point ➡ Enables the simple centring of the drill for precision work.
