

# 1090162 | Shock Series concrete drill bit - Monobloc hexagonal shank **TECHNIC (Blister)**

High-performance drill bit for the rotational drilling of construction materials. Shock Series-compatible quick-change hexagonal attachment.

- Especially for concrete and brick
- Rotation drilling
- Superior long life
- Quick tool changing
  
- Quick-change shank
- High-strength steel
- Monobloc body
- Carbide cutting insert

## Machine

## Application

## Features

## Properties and benefits

- + Quick-Change hex attachment: a hexagonal recessed attachment for the quick locking and unlocking of the bit. Compliant with the DIN 3126 E6.3 standard → Enables the quick changing of your bits by doing away with the manual tightening/loosening of the chuck. For drills and screwdrivers.
- + High strength steel body: body designed in a grade of steel designed for thermal processing, enabling excellent power and torque transmission. → Enables optimal power and torque transmission to the head of the tool.
- + Monobloc body: body designed from a single steel bar for both the hexagonal shank and the cut section. → Enables optimal torque transmission between the hexagonal shank and the head of the tool.
- + Carbide cutting insert: carbide cutting insert for breaking down construction materials → Enables the effective breaking up of materials.

## Sets

5 Shock Series concrete drill bits, hexagonal shank Ø 3 to 8 mm
