Features

Properties and benefits

- + SDS+ shank: attachment for SDS+ hammer drills (10 mm shank diameter) compliant with the SDS+ label, up to a power of 3 joules. ➡ Maximum striking power transmission for the simple and fast processing of the most difficult materials. For bits measuring 4 to 25 mm.
- + High strength steel body: body designed in a grade of steel designed for thermal processing, enabling excellent power and torque transmission. ➡ Enables optimal power and torque transmission to the head of the tool.
- + Multi-facetted cutting insert: carbide cutting insert designed with multiple facets, promoting the effective splitting of the materials ➡ Enables the excellent splitting of materials into dust, thus facilitating their extraction.
- + Centring point: carbide cutting insert designed with an integrated centring point at its centre. ➡ Enables the easy centring of the drill, particularly in coarse materials. Excellent drilling precision.
