Features

Properties and benefits

- + Tri-flat shank: cylindrical shank with 3x 120° flats, for 3-piece drill chucks. ➡ Enables maximum torque transmission Prevents the rotation of the bit in the chuck. Specially adapted for through-holes.
- + High strength steel body: body designed in a grade of steel designed for thermal processing, enabling excellent power and torque transmission. ➡ Enables optimal power and torque transmission to the head of the tool.
- + Multi-faceted cutting insert: carbide cutting insert designed with multiple facets, promoting the effective splitting of the materials ➡ Enables the excellent splitting of materials into dust, thus facilitating their extraction.
- + Centring point: carbide cutting insert designed with an integrated centring point at its centre. ➡ Enables the easy centring of the drill, particularly in coarse materials. Excellent drilling precision.
- + SLR laser graduation: laser graduation on the cutting part of the drill bit. ➡ Laser graduation allows you to control your drilling depth while the bit is rotating.
