```

[^0]

Properties and benefits

+ Split-point grinding:reduction of the drill tip. $\odot$ Enables the simple self-centring of the drill bit on the smoothest of surfaces. Significantly reduces the requried axial load.
+ Cylindrical shank: the diameter of the shank is equal to the diameter of the tip. $\odot$ Enables versatile use on portable electrical tools and CNC machine tools.
+ $30^{\circ}$ type N flute: normal flute profile with a $30^{\circ}$ helix angle. $\odot$ Suitable for general use. Provides good rigidity to the tool, as well as excellent drilling precision.
+ $5 \%$ cobalt high-speed steel: HSS substrate enriched with $5 \%$ cobalt. Improved heat retention (strength, cutting sharpness) $\odot$ For general use in metals up to $1200 \mathrm{~N} / \mathrm{mm}^{2}$.
$\pm 135^{\circ}$ tip: $135^{\circ}$ tip angle for the sharpening of the drill bit. $\Theta$ Suitable for strong and difficult materials. Enables a shorter and stronger cutting edge, thus prolonging the service life.

[^0]:    - Especially for high-strength steels, stainless steels and cast irons
    - Deep and through-drilling
    - Rapid drilling
    - Tough
    - Versatile use
    - Automatic centring
    - Cylindrical shank
    - $30^{\circ}$ type N flute
    - 5\% cobalt HSS
    - $135^{\circ}$ tip
