

The Torsion bit: ideal for screwing into metal and hard materials | Torsion effect.

- 6.35 mm hexagonal shank
- With colored ring
- Anti-shock
- For impact machines
- Torsion breakage-resist.

5 PZ bits + 5 PH bits + 7 TX bits + 4 Hexa. bits + 1 impact bit holder with powerful circular magnet - SHOCK SERIES

Machine

Features

Properties and benefits

- + 6.35 mm hexagonal shank / DIN 3126 C 6.3 standard: geometric characteristics comply with dimensional standards. ➡ Enables a perfect hold with bit-holders.
- + With different color rings depending on the screw heads ➡ For the simple and fast recognition of screw head types. Each screw head has its own colour code
- + Anti-shock: 4 corners made from anti-shock elastomer, and a glass panel for a perfect view of the contents. ➡ Transport this case to your sites, and carry it up a step ladder or ladder in complete safety: the case can withstand any potential drops.
- + Shock Series Impact: geometry and material specifically designed for use on high-power impact machines. ➡ Resistant to high tightening torques and can handle all seized screws and bolts.
- + Break-resistant twist: reduced central geometry and special thermal treatment that absorbs peak screwing forces and extreme torque variations. ➡ Prevents the premature breakage of the bit, as well as its premature wear, for a longer service life.
