

1152192 | Magnetic clamp holder - IMPACT TECHNIC (Blister)

Impact magnetic nutsetters: for use on an impact screwdriver, to overcome extreme tightening constraints.

- Quick-change shank
- magnetic
- For impact machines

Machine

Features

Properties and benefits

- + Quick-Change hex attachment: a hexagonal recessed attachment for the quick locking and unlocking of the bit. Compliant with the DIN 3126 E6.3 standard → Enables the quick changing of your bits by doing away with the manual tightening/loosening of the chuck. For drills and screwdrivers.
- + Enables the transmission of the magnetisation to the screw or nut. → Enables convenient and faster work, by preventing the dropping of screws or of the nut, thanks to its magnetisation.
- + Shock Series Impact: geometry and material specifically designed for use on high-power impact machines. → Resistant to high tightening torques and can handle all seized screws and bolts.
