

1152222 | Screwdriver bit -Torsion TiN - For Pozidriv screws ESSENTIAL (Blister)

The Torsion TiN bit for intensive screwing. TiN coating to prevent premature wear. Torsion effect.

- Breakage-resistant tool
- Maximum long life
- Intensive and repetitive work

- 6.35 mm hexagonal shank
- With colored ring
- TiN coating
- Torsion breakage-resist.

Machine

Features

Properties and benefits

- + 6.35 mm hexagonal shank / DIN 3126 C 6.3 standard: geometric characteristics comply with dimensional standards. ➡ Enables a perfect hold with bit-holders.
- + With different color rings depending on the screw heads ➡ For the simple and fast recognition of screw head types. Each screw head has its own colour code
- + TiN coating: surface treated with titanium nitride, for resistance to wear. ➡ Enables greater longevity of the screwdriver bit and protection against corrosion.
- + Break-resistant twist: reduced central geometry and special thermal treatment that absorbs peak screwing forces and extreme torque variations. ➡ Prevents the premature breakage of the bit, as well as its premature wear, for a longer service life.

Sets

7 pieces - 6 torsion TiN coated bits PZ + 1 magnetic bit holder

22 pieces - 21 TiN coated torsion bits + 1 Quick-Change magnetic bit holder

35 pieces - 34 TiN coated torsion bits + 1 magnetic Quick-Change bit holder

48 pieces - 47 TiN coated bushed torsion bits + 1 magnetic Quick-Change bit holder
