

1152226 | Screwdriver bit -Torsion TiN - For Pozidriv screws ESSENTIAL (Hanging box)

The Torsion TiN bit for intensive screwing. TIN coating to prevent premature wear. Torsion effect.

- Breakage-resistant tool
- Maximum long life
- Intensive and repetitive work
- 6.35 mm hexagonal shank
- With colored ring
- TiN coating
- Torsion breakage-resist.

Machine

Features

Properties and benefits

- 6.35 mm hexagonal shank / DIN 3126 C 6.3 standard: geometric characteristics comply with dimensional standards. 🕏 Enables a perfect hold with bit-holders.
- With different color rings depending on the screw heads 🌣 For the simple and fast recognition of screw head types. Each screw head has its own colour code
- TiN coating: surface treated with titanium nitride, for resistance to wear. Enables greater longevity of the screwdriver bit and protection against corrosion.
- Break-resistant twist: reduced central geometry and special thermal treatment that absorbs peak screwing forces and extreme torque variations. Prevents the premature breakage of the bit, as well as its premature wear, for a longer service life.
