

- Quick-change shank
- Laser marking
- Black phosphated aspect
- For impact machines
- Ball system

Machine

Features

Properties and benefits

- + Quick-Change hex attachment: a hexagonal recessed attachment for the quick locking and unlocking of the bit. Compliant with the DIN 3126 E6.3 standard → Enables the quick changing of your bits by doing away with the manual tightening/loosening of the chuck. For drills and screwdrivers.
- + Laser marking: product data and characteristics indelibly engraved. → Allows you to instantly find the right product for the right use.
- + Black phosphated: chemical surface treatment process. → Enables greater resistance to corrosion
- + Shock Series Impact: geometry and material specifically designed for use on high-power impact machines. → Resistant to high tightening torques and can handle all seized screws and bolts.
- + Ball system → Enables the locking of the accessory without any added safety ring or pins.
