

1200174 | Snow & ice drill bit 1400 mm - Carbide cutting insert - Hexagonal shank - Light alloy body **TECHNIC** (Plastic sleeve)

High-performance and incredibly light drill bit for the fast rotation drilling of snow and ice, thanks to its aluminium alloy body and carbide cutting insert.

- Incredibly fast drilling
- Lightweight tool
- Incredibly fast drilling
- Tough
- Anti-rotation attachment

- Tri-flat shank
- Lightweight alloy body
- Carbide cutting insert

Machine

Application

Ice & frozen

Features

Properties and benefits

- + Tri-flat shank: cylindrical shank with 3x 120° flats, for 3-piece drill chucks. ⤴ Enables maximum torque transmission Prevents the rotation of the bit in the chuck. Specially adapted for through-holes.
- + Lightweight alloy body: aluminium alloy body, resulting in a tool with minimal weight. Flutes designed for the excellent evacuation of snow and ice. ⤴ Enables the reduction of the weight of the tool, reduces user fatigue, and prevents MSDs. Excellent evacuation of snow and ice.
- + Carbide cutting insert: carbide cutting insert for breaking down construction materials ⤴ Enables the effective breaking up of materials.
