

1200192 | Dry core diamond hole saw **TECHNIC** (Blister Box)

Rapid (2200 rpm) and precise drilling of very hard materials, for ceramic/stoneware, tiles, Class IV-V.

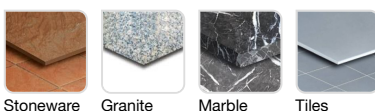

- Hexagonal shank
- High-temp. soldering
- Dry drilling

Machine

Application

Features

Properties and benefits

- + Hexagonal shank: shank machined with 6 flats ➡ Excellent hold of the bit inside the chuck, enables maximum torque transmission.
- + High-temperature soldering: diamond grains are welded at a high temperature for better adherence to the crown. ➡ The resistance of the grains increases the life of the tool, and also enables the drilling of very strong materials.
- + Dry drilling: enables drilling without lubricant. ➡ "Dry" work, with neither water nor oil, clean and safe environment.
