

1T50352 | Jigsaw blade - For wood carpentry - T attachment **TECHNIC** (Blister)

Bi-metal, the perfect combination of flexibility (HSS "spring" steel), and durability (welded HSS teeth). Head treated in a vacuum furnace. Suitable for wood & metal working.

- Cross ground, tapered
- HSS toothing

Machine

Application

Wood carpentry

Features

Properties and benefits

- + Cross ground, tapered: each tooth is perpendicular to the cutting axis, is aligned, and cuts along its entire width. The sides and the back are tapered. ⤴ Enables fast and straight cutting. The blade does not come back into contact with the material and enables a fine and clean cut.
- + Bi-metal steel blade: combination of progressive toothing made from quick-cutting tempered steel (HSS), and the body made from high-strength carbon steel (HCS). ⤴ Very flexible, used when there is a risk that the attachment will break. Very high resistance to wear, for a longer service life.
