

# 1T52044 | HSS drill bit with pilot and ejector ESSENTIAL (Hanging tube)

For use on low-thickness steel, sheet metal, stainless steel, aluminium, PVC, IPN etc. For all mechanical tasks and tasks relating to car bodywork, electrical work, plumbing.

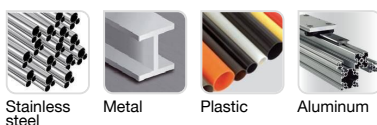

- High-speed steel
- Ejector spring

## Machine

## Application

## Features

## Properties and benefits

- + High-speed steel: HSS substrate ➡ For general use in steels and cast irons up to 950 N/mm<sup>2</sup>
- + Ejector spring: for quick and continuous work ➡ Enables the rapid removal of the core in thin sheet metals.
