

# XT50074 | Circular saw blade - Finishing - For hardwood, laminated wood, parquet - For table saw ESSENTIAL (Carton sleeve)

Perfectly adapted for precise and careful sawing requiring a perfect, cheep-free cutting surface.

- Alternate bevel tooth ATB
- ATB toothing
- Expansion slots
- Anti-kickback heel

## Machine

## Application

## Features

## Properties and benefits

- + Alternate bevel teeth (ATB): bevelled teeth on the upper side, alternatively on the right and on the left. ➡ Ideal for longitudinal and transverse cuts. Suitable for universal use in hard and soft woods, chipboard ...
- + ATB toothing with a positive angle of attack. Teeth angled towards the front. ➡ Enables more aggressive work.
- + Expansion slots: these are distributed along the outer edges of the disc. ➡ They allow the metal to expand when it heats as a result of friction, thus avoiding the deformation of the blade.
- + Anti-kickback heel: the presence of an anti-kickback heel is vital. They are located at the back of the teeth. ➡ Limits the quantity of material removed by each tooth of the blade. Thus prevents excessive cutting effort and eliminates wood emissions.
