

High-quality, highly practical tool with carbide teeth. Hole saw designed for intensive and safe use on hard materials.

- High-temp. soldering
- Carbide teeth
- high clearance

Machine

Application

Features

Properties and benefits

- + High-temperature soldering: the carbide teeth are welded at a high temperature for better adherence to the crown. ➡ The procedure for the fixing of the pads increases the service life of the tool.
- + Carbide teeth: Brazed carbide hole saw teeth ➡ Offers precise cutting and improved performance in hard materials such as brick, Plexiglass and exotic woods.
- + High clearance hole saw: openings in the hole saw. ➡ Enables the better evacuation of the cut material.
