Application

Plastic

Wood

Features

Properties and benefits

- + For creating a V-shaped groove: cutter shape with a 90° triangular tip. ➡ Allows you to create a 90° V-shaped groove.
- + Diamond cut HM blades: cut micro-grain tungsten carbide blade for a diamond grinding wheel. ➡ Enables simple and precise work on hard or soft woods, melamine-coated woods, laminated woods, and plastics. Offers a clean cut, and comfortable cutting.
- + Ø8 mm attachment: rectified cylindrical shank with an 8 mm diameter, standard, without flats. ➡ Suitable for routers with an 8 mm bit-holder.
